

Knowing Your Situation

Most businesses know when they are profitable, growing and on solid financial footing. When businesses start a downturn, or enter into a neutral or declining position, they sometimes don't assess their situation immediately and act accordingly. Early recognition of trouble is when management's choices are most cost-effective and plentiful. At FRA, our teams will help your management team accurately assess your situation and develop a plan that suits your objectives. Since 1986, we have assisted hundreds of businesses locally and nationally. An FRA team will help you to see your position clearly and move forward effectively. From turnaround services to crisis management and restructuring solutions, FRA is available to assist you, no matter what the situation. Timing is critical, so if you think you may need help, schedule a free consultation with us today. We listen and get to the heart of the problem as we examine every facet of your business.

Here are some basic signs to consider. If you answer "yes" to more than 3 of these questions, contact an FRA professional today at 513.793.8688, or email us at fralze@juno.com.
